

SPREADING THE POWER OF VT

Vivid Vision has a dedicated marketing team to bring patients to your practice. We believe in the power of vision therapy, and our mission is to spread the word. Vivid Vision promotes both our system and our partner clinics using ad services on major search engines, social media, and national news outlets such as Time and CNBC. Through our Patient Referral Program, people with amblyopia, strabismus or other binocular vision disorders come to us looking for clinics offering Vivid Vision. We then connect them to any partner clinics in their area participating in the program!
